Journey of Our Company

2023

Grew to 100+ members, enhancing our operational capacity.

2022

Earned ISO Certification, reinforcing our commitment to quality.

2021

Expanded its global footprint, broadening our market reach.

2020

Was established as a Europe-Bangladesh joint venture, uniting expertise across continents.

2019

Expanded its team to over 50 members, amplifying our capabilities.

2018

Officially registered with RJSC, formalizing our legal standing.

Our Mission & Vision

Our vision

To unleash unprecedented growth across industries worldwide, equipping them to excel in a modern tech-driven world with our next-gen software solutions.

Our Mission

To empower industries worldwide with innovative, specialized software solutions. Having achieved great success in the challenging textile sector, we bring proven capabilities to a diverse spectrum of industries.

We have been able to gather a crew of professionals possessing outstanding talent who can shape and mold their collective experiences with their challenging, rewarding, and growth-oriented work.

Life @ SKYLARK

Skylark Soft Limited champions a dynamic corporate culture, blending innovation with employee engagement through events, industry fairs, and an indoor recreation zone.

Business Growth

Business Excellence

Clear focus on understanding the business process and problematic areas

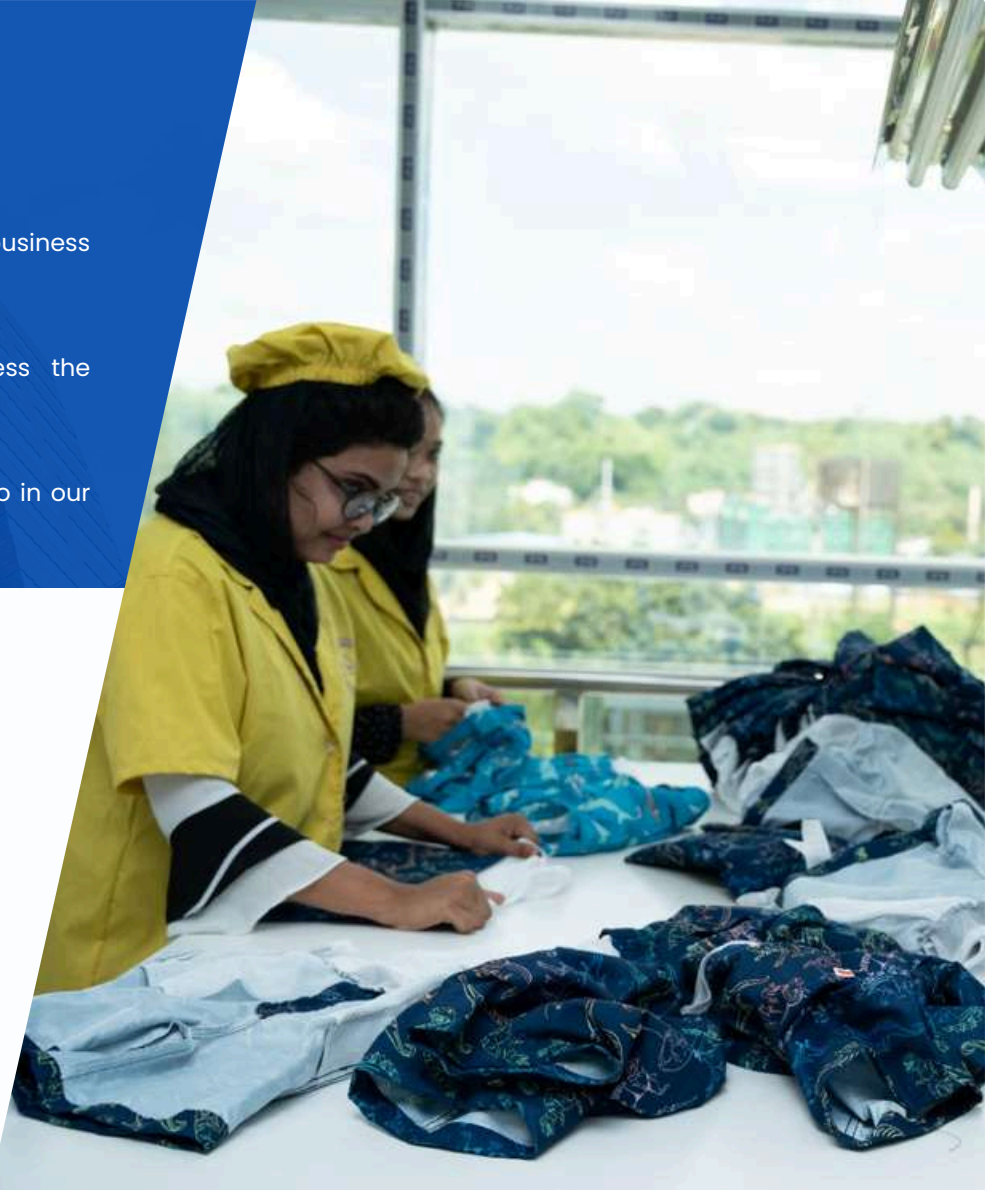

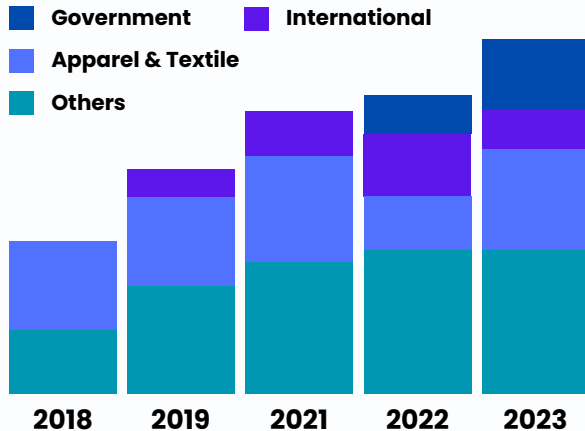

Customer Satisfaction

Delivering the perfect mix to address the business concern with 100% satisfaction

Quality Control

Quality is the first priority of what we do in our business process

Our company's strengths and core competencies begin with technical excellence, which is one of our greatest strengths. It gives us the confidence to design, build, develop, test and deliver the perfect application in this competitive market to our customers.

Areas we cover

AI & BI

Barcode, QR Code and RFID

Industry 4.0 and IoT

Big Data

Blockchain

Technical Strengths

Ready Software for Govt. & Autonomous Bodies

Personnel Management Information System (PMIS)

Asset Management System (AMS)

Inventory Management System (IMS)

Our People

We have a strong vision for our company

CARE Management

C

Customer's need

Care about customer's needs & committed to deliver that.

A

Accountable

Accountable for all the projects quality and schedule issue.

R

Research

Experts for any research and development challenges.

E

Enhancement

Enhancement of features for more successful product.

What We Do

We specialize in a range of services designed to empower your business in the digital age. From secure web solutions and customized software to real-time inventory tracking, mobile app development, strategic IT consultancy, and cost-effective offshore solutions, we offer comprehensive, cutting-edge services tailored to your specific needs.

Web Based Solution

We provide scalable, secure web-based solutions designed to elevate business performance and user experience, thanks to our specialized expertise in web technologies.

Customized Software Solution

Tailored to your unique needs, our software solutions streamline operations, enhance productivity, and give your business a competitive edge.

Barcode / QR Code / RFID Based Solution

Our Barcode and RFID solutions offer real-time inventory tracking and supply chain management, crucial for operational efficiency in the textile industry.

Mobile Application Development

We create robust mobile applications, featuring intuitive user interfaces, that integrate seamlessly with your existing systems for business-critical, on-the-go access.

IT Consultancy

Receive actionable insights and strategic guidance from our seasoned IT consultants to successfully navigate the complexities of today's technology landscape.

Offshore & Outsourcing Services

Benefit from our cost-effective, high-quality offshore and outsourcing services, offering specialized skills and scalable solutions for your project needs.

Our Products

We create products as tools from the heart. 

A comprehensive ERP solution for the garment manufacturing industry, integrated with various modules that encompass all aspects of your garment business.

PROTRACKER is a cloud-based real-time production tracking software for the apparel industry that manages the entire production process.

AQAI offers a comprehensive, efficient, and accurate approach to garment quality assurance. It effectively combines traditional QC processes with modern technology.

This is a barcode-enabled fabric roll tracking system. We utilize an exclusive label and ribbon, applied to the fabric through a heat seal machine.

CUTRACKER is a bundle card generation and management tool for managing and tracking all information in the cutting section of garments.

goRMG Store encompasses all types of inventory processes for textiles and garments, including yarn, gray & finished fabric, trims, dyes & chemicals, maintenance & scrap, and general & all kinds of stores.

Our Products are our strength.

TACTIC is a complete planning software for the apparel industry. This software system is essential for industry-level management to ensure the timely delivery of an order.

This is a complete HR and Payroll management system, designed to be a web-based solution for your HR department. The main goal is to provide benefits to both employees and admin.

STOCKLINE is a full-featured accounting management software designed specifically for the apparel industry.

A comprehensive enterprise solution designed for all types of industries to manage day-to-day business activities, including accounting, project management, and more.

It is a technology specifically tailored to manage and enhance all of your company's relationships and interactions with existing customers and potential clients.

VATAX is software that is enriched with all types of input-output coefficient features, including the BOM (Bill of Materials) process. It's specially developed for managing all kinds of VAT payments.

An ultimate ERP solution for the garment manufacturing industry is integrated with various modules that encompass all aspects of your garment business. It aims to track all activities, from receiving orders from buyers to costing, resource planning, procurement of raw materials, production management, inventory management, import-export processes, and order reconciliation. This automated solution allows you to easily monitor your business activities and the entire operations of your garment manufacturing process.

Why do we use it ?

-  **Cost Optimization**
Reduces waste and saves money.
-  **Enhanced Security**
Protects sensitive data.
-  **Customer Focus**
Boosts satisfaction and loyalty.
-  **Audit Trail**
Simplifies audits with detailed records.
-  **Scalable Solutions**
Grows with your business needs.
-  **Collaborative Environment**
Unites teams on one platform.
-  **P2P Approval**
Secure validations
-  **Quality Assurance**
Ensures high-standard products.
-  **Real-Time Analytics**
Enables quick, informed decisions.
-  **Regulatory Compliance**
Automates legal adherence.
-  **Resource Allocation**
Maximizes productivity.
-  **Business Continuity**
Offers robust backup and recovery.

goRMG ERP is the Ultimate enterprise solution for Textile & Apparel. It covers Knit Composite Factories, Knit Garment Factories, Woven & Denim Garment Factories, Sweater Factories and Knit Textile (Knitting & Dyeing) Factories.

PROTRACKER is the first real-time automated production tracking system in Bangladesh, designed specifically for the readymade garment industry. It is a fully cloud-based, real-time production tracking solution for the apparel industry. It manages the entire production process, from handling order details to overseeing production, and shipping, and can be seamlessly integrated with any other management software.

Why do we use it?

Fully automated

Fully automated, real-time, responsive

Remote Access

Use from anywhere in the world

Zero Waiting Time

Less WIP, Zero Waiting Time, Quick Decision Making.

Cloud-Based

No need for physical servers, reducing IT costs.

Efficiency

High Efficiency & Productivity.

Realtime Tracking

Real-time hourly production data, floor-line efficiency

Accountability

Enhances Accountability

Piece/Bundle Flow

Maintains both Piece and Bundle flows.

Challan /Gate Pass

Auto challan / gate pass and reports.

Automatic Rejection

Fake production track, Automatic Rejection Count.

Notification

Email / SMS Notification.

Integration

Seamless with other management software.

Backup

Data backup on database

Barcode/ QR code

Receive data from barcode or QR code makes fast opt.

Cost Analysis

Immediate overview of production costs.

Quality Checks

Automated QC during production.

Data Security

Advanced encryption safeguards confidential information.

Multi-User

Allows multiple users with different roles.

Updates

Regular software updates with new features.

Mobile Friendly

Accessible on mobile devices.

PROTRACKER is a barcode/QR Code/RFID-enabled real-time production tracking Software for apparel industry.

 MIS

Apparel Application for Quality Assurance & Inspection

Skylark Soft Limited is proudly unveiling AQAI, a cutting-edge software solution designed to ensure the best quality Assurance and Inspection management systems by Heat Map Tracing Technology for the first time ever in the apparel industry of Bangladesh.

By realizing the urges of 4IR in the textile and RMG industry which is mostly focusing on the Quality Product, Skylark Soft Limited has had approached for this innovation to ensure the highest quality of product in cost efficient manner.

Why do we use it ?

-  Quality control is pivotal in the apparel industry for maintaining brand integrity, ensuring customer satisfaction, and reducing costs associated with defects and returns.
-  A single quality mishap can significantly impact brand reputation and customer loyalty.
-  Effective QC systems are proven to reduce production errors by up to 30% (source: Apparel Industry Statistics).

Overview of AQAI

Order Management

- Purchase Order Entry

IE/Work Study

- Sewing Target
- Operation Bulletin (SMV, Process, Operator, Station & Others)

Comprehensive Quality Overview

- AQAI offers a 360-degree view of quality control, enhancing production quality and efficiency across your production line.

Integrated Quality Data

- AQAI streamlines quality control by unifying all related data for cohesive management.

Detailed Quality Analysis

- Track quality at a granular level with AQAI, refining production strategies for a competitive advantage.

Automated Data Accuracy

- Reduce manual errors and ensure data accuracy in quality control with AQAI's automated systems.

Instant Quality Insights

- Access real-time quality reports and analytics with AQAI for timely decision-making and effective quality management.

AI/BI/4IR

- Line-wise dashboard for sewing line TV
- Hourly Production - Line wise, Floor wise, Company wise.
- Current Target , Day Target , Manpower, Efficiency, Reject, Spot, DHU, Working hour, Achievement.
- Graphical View Of defects- Part Wise - Heat Map
- Line wise Graphical Production Competition view
- Line wise Defect Graphical Status

MIS Report

- Infographic Dashboard
- 100+ Customizable MIS Reports

Endline QC(Production)

- Defects Entry
- QC Operation
 - RFT/FTT
 - Defect/Alter
 - Rework
 - Reject
- Activity Status

A barcode-enabled fabric roll tracking system that utilizes exclusive labels and ribbons applied to the fabric through a heat-sealing machine. The barcode remains intact on the fabric even after washing and dyeing processes.

The software is user-friendly and easy to operate. It includes unique and essential features tailored to meet your requirements. With a customized reporting system and an elegant theme, the software is professionally designed to serve your specific needs.

Why do we use it?

 **Cost Vs Manpower**
It saves fabric, cost and manpower

 **Shading Problem**

It comes with the **Following Features & Benefits**

- Generates Automated Bundle-card
- Tracks Fabric Wastage
- Resists Excess Cutting
- Saves Manpower & Time
- Tracks Consumption Pass/Fail
- Minimizes Shading Problem

An integral part of the Apparel Industry is Inventory management. For this purpose, garments inventory management software can relieve the owners of managing clothes & accessories. Moreover, an appealing inventory report can do the rest to get the desired revenue.

goRMG STORE includes all types of inventory processes like yarn, grey and finish fabric, trims, dyes & chemicals, maintenance & scrap, and general and all kinds of stores for textiles and ready-made garments.

Why do we use it ?

- 
Stock Reports
 Prevents excess stock and stock-outs.
- 
Product Identification
 Easily maintain product identification.
- 
Different Category
 Sort merchandise with ease.
- 
Updates the order
 Syncs order status with fulfillment.
- 
Comprehensive Inventory

Quick Decision-making
- 
Waste Reduction
 Optimizes resource usage, minimizing waste.
- 
User-Friendly
 Intuitive design for easy navigation.
- 
Data Security
 Advanced encryption safeguards information.
- 
Scalability
 Adapts to business growth and changing needs.
- 
Regulatory Compliance

Custom Reports
- Automated features for legal adherence.
- Generates tailored reports for varied needs.

It comes with the **Following Modules**

-  Trims Store
-  Gray Fabric Store
-  Yarn Store
-  Dyes & Chemical Store
-  Finish Fabric Store
-  General Inventory
-  Machine Inventory

goRMG STORE streamlines apparel inventory from yarn to garments, aiding revenue growth.

According to the buyers' testing requirements garments, fabrics, yarn, and accessories (zipper, button, eyelet, etc.) need to be tested by the buyer-approved testing labs to ensure that the goods maintain quality standards and there is no presence of restricted chemicals in garments and accessories.

Garments and apparel lab testing is one of the most prerequisite steps that should be ensured. The right lab management software can reassure you a lot. To illustrate, the garment lab management system- goRMG LAB comprises top-level modules aligning with the Textile Industry's needs.

Why do we use it?

- 
Materials Checking
 Prevents excess stock and stock-outs.
- 
Production Monitoring
 Easily maintain product identification.
- 
Assessing Products
 Sort merchandise efficiently.
- 
Investigate Fault
 Updates the order status in real-time.
- 
Achieving Compliance
 Ensures adherence to industry regulations.
- 
Errors Detection
 Quick identification of product defects.
- 
Real-Time Alerts
 Immediate notifications for critical results.
- 
Customer Satisfaction
 Improves end-product quality.
- 
Reporting & Analytics
 Generates detailed lab reports.
- 
Data Security
 Advanced encryption for data protection.
- 
User-Friendliness
 Intuitive interface for ease of use.
- 
Waste Reduction
 Optimizes resource usage in testing.

It comes with the **Following Modules**

- Fabric Lab ●
- Garments Lab ●
- Log Book ●
- TRF Testing ●
- Review & Assignment ●
- Reports ●

All Reports:

- TRF Report
- Worksheet Report
- Test Method-wise Report
- Buyer-wise Test Report
- Buyer-wise Test Summary
- Style Analysis Report

TACTIC allows planners to access up-to-date information about in-house fabric, accessories, and other materials, enabling effective and timely planning of orders.

Leveraging AI, TACTIC provides planners with estimated production completion dates, utilizing historical data and critical path analysis for accurate forecasting. The system offers detailed insights into the planning status of specific orders, allowing planners to assess and ensure alignment with shipment deadlines.

Why do we use it?

 **Real Time data**
Prevents excess stock and stock-outs

 **Production Scheduling**
easily maintain product identification

 **Updates Planning**
Quickly sorts and manages merchandise for efficient planning.

 **Progress Order**
Updates the order of items with the fulfillment

 **Forecast Accuracy**
Improves demand planning through precise forecasts.

 **Resource Optimization**
Allocates resources efficiently to reduce costs.

 **Timely Delivery**
Ensures deadlines are met for customer satisfaction.

 **Workflow Visibility**
Provides clear insight into each production stage.

 **Integration**
Easily integrates with other management systems.

 **Interactive Dashboard**
Allows for real-time monitoring and quick decision-making.

 **Adaptive Scheduling**
Adjusts plans in real-time for unforeseen changes.

 **Drag and Drop**
Simplifies scheduling and rescheduling tasks.

It comes with the **Following Modules**

Container Plan

Cutting Plan

Knitting Plan

Sewing Plan

Dyeing Plan

Finishing Plan

- 360 Degree View with AI featured
- Planning with/without TNA
- Integration & as per Capacity
- Drag and Drop capabilities
- Line Split and Break Facility
- Manual Plan Change Indicator
- Real-time status of Supply Chain
- Real-time status of input stock
- Reflection and comparison with factory capacity & running load

- Integrated with IE, SMV & Efficiency
- Multiple PO wise Planning facilities.
- Style, PO, and Country-wise Plan
- Expected Production Completion date
- Real-time Line Loading
- Plan Parking Facilities
- Critical Path Management
- Real-time Reflection of Each Line plan
- Birds Eye View

An online accounting software that allows you to easily manage the money flowing in and out of your business. Manages your customers and invoices, while keeping expenses in check, and reconciles your bank accounts and transactions in real-time.

Most importantly, it helps you to make more informed decisions based on data for the betterment of your business.

Why do we use it ?

Scalability

Designed for growth, easily scales with your business.

Centralization

Centralizes all accounting data for easier access.

Reporting

Comprehensive financial reporting for decision-making.

Time-Saving

Smart, fast, and efficient for better productivity.

Minimizing Errors

Reduces the likelihood of human or manual errors.

Expense Tracking

Monitors and categorizes expenses for budgeting.

Invoice Management

Automates invoice generation and tracking.

Tax Compliance

Automates tax calculations and ensures compliance.

Cash Flow Analysis

Provides insights into income and expenditure trends.

Data Security

Ensures secure encryption and backup of financial data.

User Support

Round-the-clock customer service for troubleshooting.

A complete HR and Payroll management system. The intention is to develop a web-based solution for your HR Department by which both employees and administration can benefit in so many ways.

Our focus is on Manpower Tracking to curb misuse of time and ensure accurate salary payouts. With one click, administrators can monitor work inefficiencies and attendance, optimizing resource allocation and reducing costs.

Why do we use it?

Attendance Management

Maximizes efficiency through timely presence.

Leave Management

Automates leave application & approval

Payroll Automation

Salary calculations and disbursements.

Performance Tracking

Easy monitoring of employee performance metrics.

Analytic & Reporting

Advanced analytics and customizable reports.

Reducing Cost

Optimizes resource management to cut costs.

Time Saving

User friendly environment reduce time of operation

Access Control

Robust access control for secure management.

Document Storage

Secure and easy-to-retrieve digital document storage.

Real-Time Updates

Immediate notification of policy or schedule changes.

Data Accuracy

Ensuring data accuracy for all the time

Communication

Facilitates internal communication between teams.

Improve the HR division's functioning.
Use a single program to handle payroll and HR procedures.

It comes with the **Following Modules**

- Daily Attendance
- Employee Information
- Policy Setup
- Deduction Process
- Leave Management
- Salary Report
- Shift Management
- Provident Fund
- HR Report
- Loan Management
- Maternity Benefits

Awards & Achievement

Testimonials

M Golam Mustafa

Executive Director
GMS Composite Knitting Ind.
Limited

PROTRACKER has made a great difference in our garment production process. One of the biggest benefits is the automated data entry. Now, we only need to input order information into the system, and PROTRACKER takes care of the rest. This has saved us a lot of time and money, and it has also improved the accuracy of our data.

Overall, PROTRACKER has been a huge convenience for our company. It has saved us time, money, and errors. I highly recommend it to any garment manufacturer who is looking to improve their production process.

Soumik Dey

Director
MU Fashions Limited

PROTRACKER has been a valuable asset to our company. The rich BI features have helped us to make better decisions about our production process. For example, we now have a report that shows us our loss and profit for every minute. This report has helped us to identify areas where we can improve our efficiency and profitability.

Overall, PROTRACKER has helped us to save time and money. I highly recommend it to any garment manufacturer who is looking to improve their decision-making process.

Sojib Ahmed

Marketing Director
IRIS Design Limited

PROTRACKER has helped us to improve our fabric utilization. The system can tell us how much fabric was needed to produce a certain amount of garments, and how much fabric was actually used.

For example, we recently identified a pattern that was causing a lot of fabric waste. We were able to make a change to the pattern, which saved us a significant amount of fabric.

Overall, PROTRACKER has helped us to save money and reduce our environmental impact. I highly recommend it to any garment manufacturer who is looking to improve their fabric utilization.
